Savannah	Uncovered area	-	-	450
All of park	Covered and uncovered area	-	-	600
Rainforest Beach - located within the rainforest	Uncovered	50	50	60

WOODLAND

The award-winning Wildlife Habitat, is a wildlife immersion exhibit providing visitors with a chance to experience the Wetlands, Rainforest, Savannah and Woodland environments in an open and interactive setting. The Woodland is the first environment and is a walkthrough small bird aviary featuring a wide variety of birds, some endangered, from the drier western plain areas of North Queensland.

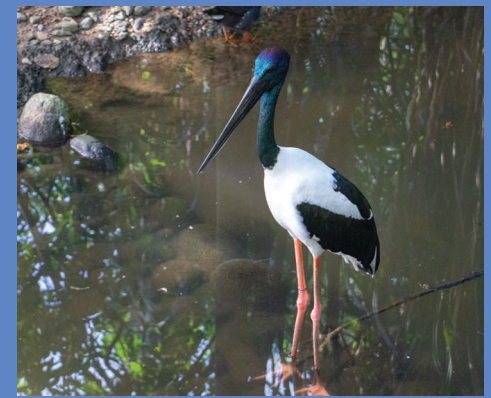

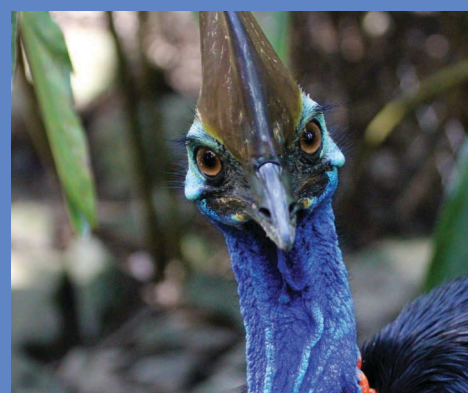

SAVANNAH

Savannah Habitat offers you the opportunity to hand-feed kangaroos and wallabies, admire the Lumholtz's Tree Kangaroos, and smile at a Crocodile. Estuarine and freshwater crocodiles lurk beneath the water or bask on banks in the sunshine. Watch as our experienced Wildlife Keepers demonstrate the sheer power of the saltwater crocodile during feeding time – or throw the boss to a saltie with our exclusive 'Swim with the Saltie' experience.

RAINFOREST

Make your way along the boardwalk of the Rainforest environment, and fully immerse yourself in the layers of the rainforest, from the floor to the canopy, whilst admiring the wildlife which occupy this world. Follow the Cassowary Walk to view local species such as Cass and Airlie, our resident southern cassowaries, as well as the Boyd's forest dragon and the colorful Eclectus parrots.

WETLAND

Wander our stork walk pathway in the Wetlands and look out for the range of birds and other wildlife that call the area home, including the Black-Necked Storks. Make your way to the top of the elevated Stork Tower and enjoy an unprecedented view of their nest (and eggs, if you're lucky!).
